TECHNICAL SPECIFICATIONS

- Polycarbonate cover
 - Monobloc digital motor – without brush - 800W (with variable speed drive)
 - Power supply voltage 220-240V Electric protection : IPx4
 - Dimensions : 300x225x670 mm (LxPxH) and net weight : 11 kg
-
- Drying time : 7 to 10 seconds
 - Output air speed : 342 à 360 km/h Sound level : 65 to 69 dB
 - Heat collecting + self-adjusting heating : < 37°C
 - Water collecting tank
 - Interchangeable triple-actions filter (air, active carbone, HEPA)
 - Antibacterial surfaces treatment (SGS certification)
 - UV Sterilisation

ADVANTAGES

- Ultra fast drying
- Limited sound rate
- Comfort of use : wide drying zone, avec 4 sensors, accessible to children and to people with reduced mobility (PMR)
- Comfort of use : hot air flow without bacterial proliferation
- Sanitary use : water collecting tank, anti bacterial treatment, triple actions filter , UV Sterilization
- Easy maintenance : easy accessibility of tank, water collecting circuit
- Low power consumption
- Anti-vandalism inspection doors
